Table U04 for each geographic area contains incorrectly categorised data. The categories 'Western Asian Languages', 'Other Asian Languages' and 'Other Languages and Inadequately Described' show zero data; the counts for these categories are incorrectly included in the category 'Other European Languages'.

Table U04 has been reproduced herein for each geographic area listed in this publication with the data correctly categorised.

EXPLANATORY NOTES

Introduction

This publication, containing results from the 1986 Census of Population and Housing for the Brisbane Statistical Division, complements a series for each State and the Northern Territory, which are designed to meet the increasing need for more comprehensive census data on a place of usual residence basis at the legal local government area (LGA), and equivalent, level.

- 2. The Brisbane Statistical Division has been delineated to embrace the area expected to contain the urban development of Brisbane for a period of at least twenty years. The legal LGA of the City of Brisbane comprises most of this area. To enable data to be presented at the suburb or locality level, statistical local areas (SLAs) are used. For a full definition of SLAs see Appendix A.
- 3. As the Australian Capital Territory has no legal LGAs, a separate publication Census 86-Profile of Statistical Local Areas-Usual Residents Counts: Australian Capital Territory (2477.0) is being produced.
- 4. Census counts on a place of usual residence basis (U) are not comparable with census counts on a place of enumeration basis (C), or the estimated resident population (ERP) figures released by the ABS. A brief description of the two bases of enumeration and the ERP is in paragraphs 10, 11 and 12. More details can be found in The 1986 Census Dictionary (2174.0). All census table numbers are prefixed as appropriate with the letter 'C' or 'U'. However, this publication contains only tables in the 'U' category.
- 5. This publication contains, for each SLA, the following 15 tables:

U01 Summary of persons

U02 Age in years

U03 Birthplace

U04 Language spoken at home

U05 Proficiency in English

U06 Marital status

U07 Religion

U09 Level of qualification

U10 Field of qualification

U11 Individual income

U12 Marital status of the labour force

U13 Labour force status

U14 Occupation

U15 Industry

U16 Hours worked

NOTE: Table U08 — Type of educational institution being attended — HAS BEEN DELETED AS IT CONTAINS INCORRECT DATA.

6. For those SLAs with less than 100 persons, only 8 tables are provided, as follows:

U01 Summary of persons

U02 Age in years

U03 Birthplace

U04 Marital status

U05 Religion

U07 Labour force status

U08 Occupation U09 Industry

NOTE: Table UO6 — Type of educational institution being attended — HAS BEEN DELETED AS IT CONTAINS INCORRECT DATA.

7. Printed census publications contain broad summaries only, and represent a very small amount of the total census data released. More detailed cross-tabulations for the larger geographic levels (e.g. State or statistical regions) are available on microfiche and magnetic tape, and somewhat less detailed tabulations for small areas (e.g. collection districts or statistical local areas), are available on microfiche, magnetic tape, CD-ROM and floppy disk. For further information see Census 86-Data Release Plans (2173.0).

Scope and coverage

- The 1986 Census of Population and Housing aimed at counting every person who spent census night, 30 June 1986, in Australia, including persons on vessels in or between Australian ports, or on board long-distance trains, buses or aircraft. All private dwellings were also counted, whether occupied or unoccupied. Occupied non-private dwellings, such as hospitals, prisons, hotels, etc. were also included. People were counted where they were on census night, which may not have been where they usually lived. Place of usual residence was asked of each person, and answers, where they differed from enumeration address, were coded to statistical local area level. Visitors to Australia were enumerated regardless of how long ago they had arrived or how long they planned to stay. They are included in the counts based on place of enumeration but not in those counts based on usual residence. Australian residents out of the country on census night were excluded from the count.
- 9. Diplomatic personnel and their families are out of the scope of the census, as are diplomatic residences.

Definitions

Census Count—Place of Enumeration(C)

10. Persons were counted where they were actually located on census night. Overseas visitors are included and Australians overseas are excluded. No adjustment is made for census underenumeration. Statistics based on place of enumeration are not included in this publication.

Census Count—Place of Usual Residence(U)

11. Persons were counted according to their stated place of usual residence (i.e. their answer to question 6— see Appendix B). Overseas visitors and Australians overseas are excluded, and no adjustment is made for census underenumeration.

Estimated Resident Population(ERP)

12. These estimates are formed by adding estimates of Australians overseas, and of the census undercount, to the census count at place of usual residence. The ERP at census date is updated between population censuses. ERP statistics are not included in this publication.

Data quality

- 13. Statistical collections such as the census are subject to a number of sources of error. While some errors (such as deliberate misreporting) mostly defy detection and correction procedures, the overall amount of error of this type in census results is considered to be insignificant.
- 14. Main sources of error in the census are:
 - (a) Underenumeration. Despite efforts to obtain full coverage of persons and dwellings (other than those associated with overseas diplomatic missions), some undercounting still occurs. A measure of the extent of underenumeration is obtained from a small survey of households undertaken very shortly after the census. Undercounting of persons in the 1986 Census has been estimated to be 1.8 per cent for Australia as a whole.
 - (b) Partial response. In those instances where the householder omitted to provide a response to a question, a 'not stated' code was allocated; with the exception of non-response to age, sex and marital status, and SLA of usual residence. These variables were imputed using other information on the census form, and specially constructed random tables.
 - (c) Respondent error. Computer editing procedures are used to detect obvious errors made by individuals in completing the form (e.g. a six year old person who was married). Such procedures cannot detect all respondent errors and some remain in final output.
 - (d) Processing error. Errors created during the processing of the census are kept at an acceptable level by means of a quality control system, which involves sample checking at different stages of the coding and keying operations, and taking corrective action where necessary.
 - (e) Introduced random adjustments. These adjustments are made to small non-zero cells and allow the maximum of detailed census data to be released, while protecting the confidentiality of information about individual persons. The adjustments made are very small and the general value of the data is not impaired.

Comparability with other ABS data sources

15. Some data collected in the census are also obtained by other statistical collections undertaken by the ABS. Comparisons of figures obtained from the various sources indicate that the results can differ. Users wishing to make such comparisons are cautioned to take note of differences in collection procedures, question wording, processing methodology (e.g. methods of editing and imputation), non-response levels, and conceptual differences. Comparisons with data obtained from sample surveys should also take into account differences in the population bases for the estimates, and sampling error.

Further information

16. Further information about 1986 Census statistics is available from the nearest ABS office (see Appendix C for addresses and telephone numbers). The information paper Census 86 — Data Release Plans (2173.0) describes standard output products to be released from the 1986 Census. Details of tabulations are contained in the Catalogue of 1986 Census Tables (2175.0).

Census 86 publications

17. Other statistical publications (standard series) currently planned from the 1986 Census of Population and Housing are:

Census 86 — Age and Sex of Persons in Statistical Local Areas and Statistical Divisions (2454.0-2461.0) (A series of separate publications for each State and Territory.)

Census 86 — Persons and Dwellings in Legal Local Government Areas, Statistical Local Areas and Urban Centres/(Rural) Localities (2462.0-2469.0)(A series of separate publications for each State and Territory)

Census 86 — Profile of Legal Local Government Areas — Usual Residents Counts (2470.0-2476.0)(A series of separate publications for each State and the Northern Territory)

Census 86 — Profile of Statistical Local Areas — Usual Residents Counts: Australian Capital Territory (2477.0) Census 86 — Profile of Statistical Local Areas — Usual Residents Counts: Brisbane Statistical Division (2478.0) Census 86 — Summary Characteristics of Persons and Dwellings (2479.0-2489.0)(A series of separate publications for each State, Territory, Australia and the external Territories of the Cocos (Keeling) Islands and Christmas Island)

Census 86 — Cross-classified Characteristics of Persons and Dwellings (2490.0-2498.0)(A series of separate publications for each State, Territory and Australia) Census 86 — Aboriginals and Torres Strait Islanders: Australia, States and Territories (2499.0)

Census 86 — Characteristics of Persons in Hobart Suburbs, 30 June 1986 (2201.6)

Census 86 — Characteristics of Persons in Launceston Suburbs, 30 June 1986 (2202.6)

Census 86 — Characteristics of Persons in Burnie-Devonport Suburbs, 30 June 1986 (2203.6)

18. In addition, a series of national census reports providing information on, and analysis of, the census results is planned:

Census 86 — Australia in Brief (2501.0)

Census 86 — A Summary of Major Findings (2502.0)

Census 86 — The Aboriginal and Torres Strait Islander Population (2503.0)

Census 86 — Population Growth and Distribution (2504.0)

Census 86 — Multicultural Australia (2505.0)

Census 86 — Families and Households (2506.0)

Census 86 — Rural Australia (2507.0)

Census 86 — The Aged Population (2508.0)

Census 86 — Caravan Park Dweller's (2509.0)

Census 86 — Religion (2510.0)

Census 86 — Sole Parent Families (2511.0)

Further titles may be added to this list in the future.

- 19. Users may request non-standard census output from the ABS. For more details see *Census 86 Special Data Services* (2181.0).
- 20. The following information papers are being published:

Census 86 — New South Wales Publishing Information (2101.1)

Census 86 — Data Release Plans (2173.0)

The 1986 Census Dictionary (2174.0)

Catalogue of 1986 Census Tables (2175.0)

Census 86 — How Australia Takes a Census (2176.0)

Census 86 — Census Products Price List (2177.0)

Census 86 — Understanding Family Data (2178.0)

Census 86 — Collection District Master File (2179.0)

APPENDIX A

CENSUS GEOGRAPHIC AREAS — DEFINITIONS

A. AUSTRALIAN STANDARD GEOGRAPHICAL CLASSIFICATION (ASGC)

The Australian Standard Geographical Classification (1216.0) is a new geographic classification used for the dissemination of 1986 Census data. It incorporates a number of hierarchic structures of geographic areas (also referred to as 'spatial units') and defines the individual structures and the area types of which each structure is composed. Each geographic area in the classification is identified by a unique numeric code.

The ASGC has been adopted as the standard geographic classification for ABS output. This will ensure greater comparability of statistics within the ABS and a standardisation of terminology.

Abbreviated definitions of the ASGC geographic areas which are used in 1986 Census output follow below. More detailed definitions can be found in *The 1986 Census Dictionary* (2174.0) or *Census 86 — Australian Standard Geographical Classification: Geographic Code List* (2188.0).

Collection districts (CDs)

These are the smallest type of geographic area in the ASGC and are the building blocks of which all other ASGC geographic areas are composed. They have been designed for use in population censuses and, in aggregate, cover the whole of Australia without gaps or overlaps.

States and Territories

These consist of two or more statistical divisions and cover the whole of Australia (as defined for statistical purposes) without gaps or overlaps. They encompass the geographic areas of the six Australian States and two mainland Territories.

Statistical districts

These consist of one or more statistical subdivisions and represent large urban areas of Australia outside State capital city statistical divisions. Because of their nature they can and, in some cases, do straddle statistical division and State/Territory boundaries. An example is the 'Gold Coast-Tweed' Statistical District which encompasses an urban area which lies partly in the State of Queensland and partly in the State of New South Wales.

Legal local government areas (LGAs)

These are the geographic areas of incorporated local government councils, such as towns and shires, and consist of one or more statistical local areas (SLAs). In aggregate, these cover only part of Australia. The major areas of Australia not governed by incorporated local government councils include the northern parts of South Australia, most of the Northern Territory and all of the Australian Capital Territory. Legal LGAs can and, sometimes, do straddle statistical subdivision, statistical district and statistical division boundaries. An example is 'Tweed Shire' in New South Wales. The predominantly

urban part of this shire is treated as an SLA as well as a statistical subdivision in its own right and constitutes the New South Wales part of the 'Gold Coast-Tweed' Statistical District. The predominantly rural remainder of this shire constitutes a separate SLA outside the 'Gold Coast-Tweed' Statistical District, and lies within a different statistical subdivision.

Statistical local areas (SLAs)

SLAs are a new spatial unit for the 1986 Census. The 1981 Census equivalent was the census local government area. SLAs are for the most part legal local government area (LGA) based. In special cases, where a legal LGA is much larger and more populous than the general run of legal LGAs (as is the City of Brisbane), or where there are no legal local government authorities (as in the Australian Capital Territory), the SLAs are officially defined suburbs or localities. SLAs cover, in aggregate, the whole of Australia without gaps or overlaps.

Statistical regions

These consist of one or more SLAs and cover, in aggregate, the whole of Australia without gaps or overlaps. They were designed primarily as geographic areas containing sufficient population to be suitable for the presentation of both population census and labour force statistics, within the frameworks for standard statistical outputs from these collections. The smallest region in terms of population is the Northern Territory, which had a census count of 154,848 on 30 June 1986.

Major statistical regions

These consist of one or more statistical regions and cover, in aggregate, the whole of Australia without gaps or overlaps. They do not cross State or Territory boundaries and serve the same purpose as statistical regions, though at a broader geographic (i.e. Capital City statistical division versus Balance of State) level. However, even this dissection could not, due to population size limitations, be implemented in the case of Tasmania, the Northern Territory and the Australian Capital Territory, each of which equates with a major statistical region.

Sections of State

Within a State or Territory, each section of State represents an aggregation of non-contiguous geographic areas with particular urban or rural characteristics. The sections of State within each State and Territory are the following:

Major Urban — all urban centres with a population of 100,000 and over;

Other Urban — all urban centres with a population of 1,000 to 99,999, and known holiday resorts of less population if they contain 250 or more dwellings, of which at least 100 are occupied on census night;

Locality — all population clusters of 200 to 999 persons; and

Rural Balance — the remainder of the State/ Territory.

The above section of State categories can be used in conjunction with other CD-based ASGC geographic areas to show section of State components within, say, statistical subdivisions or statistical divisions.

In addition to the above section of State categories, persons who were enumerated on off-shore oil rigs, drilling platforms and the like, aboard ship in Australian

waters, or on an overnight journey by train or bus were included in an additional category, Off-shore Areas and Migratory. There is one such category for each State and the Northern Territory.

B. NON-ASGC AREAS

Census data are also available for Commonwealth and State electoral divisions and postcode areas. A postcode and a Commonwealth and State electoral division code is assigned to each CD. Where a CD is dissected by a postcode or electoral division boundary, the entire CD was allocated to the postcode or electoral division in which the greater part of the CD population was estimated to lie.

30 JUNE 1986

Household Form

Dear Householder,

Census Night is on Monday, 30 June 1986.

The Census is like a stocktake of our nation carried out at the one time, Census Night. Statistics from it show how many people there are in each part of Australia, what they do and how they live. The Census is the only practical way to get this information and is essential for planning our future.

So the Census helps to make a better Australia

The Census is authorised by the Census and Statistics Act 1905 which provides for the compulsory completion of this form and its return to your Census Collector. The same A also protects your privacy. It forbids the publication of, or passing to anyone outside the Statistics Bureau, any information or statistics that could identify any person. Und circumstances are any names or addresses kept.

To help you, below is an easy guide to Census Form. Use it with your Census 86 bookle

Who to include on your for In question 1, list all persons (INCL) DING who spent the night of Monday, 30 June Include any persons who returned on Tuesday without having been counted somewhere el COLUMN FOR EACH PERSON

If there are more than 8 kersons in this louse ask your Census Collector for extra Personal Forms. What is a Household?

Persons living and earth together as a domestic unit are a household. A person who lives done is also a household. If there is more than one household at this address, ask your Census Collector for as many extra Household Forms as you need. A SEPARATE FORM MUST BE USED FOR EACH HOUSEHOLD.

Signature of Person
Address. No. and street
Suburb, town or locality
PostcodeDate

How to answer ea

Please use black or blue ball point oet, o Read everything careful the next question.

Most questions only the answer box. Numbers and letters alongside boxes are only for processing purposes.

you do not know the exact answer, give the best

Your privacy.

person in this household prefers a separate ensus Form for privacy reasons, ask your Census Collector or a Personal form and a Privacy Envelope. For that person, the rame, see relationship to Person 1 and write "P.F." in the se question on this form. The completed Personal Form ensus Form or a Personal hould be sealed in the envelope and given unopened to

You may also ask for a Privacy Envelope if you do not ant your collector to see your completed Census Form.

Finished?

After filling in the Census Form, please sign it and write the household address in the address panel below.
Your collector will return as soon as possible after

Monday, 30 June 1986, for the completed Census Form.

If you have any difficulty filling out this form, please refer to your Census 86 booklet. If you still have a problem, ask your Census Collector for help or phone the Census Hotline

Thank you for your help.
